TITLE 15A - ENVIRONMENT AND NATURAL RESOURCES

CHAPTER 2 - ENVIRONMENTAL MANAGEMENT

SUBCHAPTER 2B - SURFACE WATER AND WETLAND STANDARDS

Notice of Rule-making Proceedings is hereby given by the Environmental Management Commission in accordance with G.S. 150B-21.2. The agency shall subsequently publish in the Register the text of the rule(s) it proposes to adopt as a result of this notice of rule-making proceedings and any comments received on this notice.

Citation to Existing Rules Affected by this Rule-Making:
15A NCAC 2B .0311 Cape Fear River Basin and .0313 Roanoke River Basin. Other rules may be proposed in the course of the rule-making process.

Authority for the rule-making: G.S. 143-214.1; 143-215.1; 143-215.3(a)(1)

Statement of the Subject Matter:

15A NCAC 2B .0311 - Proposed reclassification of Harris Lake from Class C to Class WS (Water Supply) -V.

15A NCAC 2B .0313 - Proposed reclassifications of Hyco Lake from Class B to Class WS (Water Supply) -V & B and Mayo Reservoir from Class C to Class WS-V.

Reason for Proposed Action:

15A NCAC 2B .0311 - The Division of Water Quality is requesting that the Environmental Management Commission (EMC) reclassify Harris Lake in Wake County (Cape Fear River Basin) from Class C to Class WS-V. The WS-V classification is assigned to those waters which are generally upstream and draining to class WS-IV waters, waters previously used for drinking water supply purposes, or waters used by industry to supply their employees. This CP&L reservoir for the Shearon Harris Nuclear Plant is used for cooling water and as a source of drinking water for CP&L employees.

If reclassified, more stringent freshwater standards and ten additional water quality standards will apply to the lake for the protection of the water supply. Sampling results show that Harris Lake meets the standards for drinking water supply use. No categorical restrictions on watershed development or wastewater dischargers are required for Class WS-V.

15A NCAC 2B .0313 - The Division of Water Quality is requesting that the Environmental Management Commission reclassify Hyco Lake in Person and Caswell Counties from

Class B (Primary Recreation) to Class WS (Water Supply) - V & B, and Mayo Reservoir in Person County from Class C to Class WS-V. Both impoundments are located in the Roanoke River Basin. The WS-V classification is assigned to those waters which are generally upstream and draining to class WS-IV waters, waters previously used for drinking water supply purposes, or waters used by industry to supply their employees. These CP&L reservoirs for the Roxboro and Mayo Steam Electric Plants are used for cooling water, as a source of drinking water for CP&L employees, and in the case of Hyco Lake, for primary recreation.

If reclassified, more stringent freshwater standards and ten additional water quality standards will apply to the reservoirs for the protection of the water supply. Sampling results show that Hyco Lake and Mayo Reservoir meet the standards for drinking water supply use. No categorical restrictions on watershed development of wastewater dischargers would be required.

- (iii) Maturity. Member business loans shall be granted for periods consistent with the purpose, security, creditworthiness of the borrower and sound lending policies.
- (iv) Monitoring requirement. Credit unions with member business loans in excess of 100 percent of reserves (less the Allowance for Loan Losses account) shall submit the following information regarding member business loans to the

Administrator on a quarterly basis: the aggregate total of loans outstanding; the amount of loans delinquent in excess of 30 days; the balance of the allowance for member business loan losses; the aggregate total of all concentrations of credit to one borrower or group of associated borrowers in excess of 15 percent of reserves (less the Allowance for Loan Losses account); the total number and amount of all construction, development or speculative loans; and any other information pertinent to the safe and sound condition of the member business loan portfolio.

(D) Allowance for loan losses.

- (i) The determination whether a member business loan will be classified as substandard, doubtful, or loss, for purposes of the valuation allowance for loan losses, will rely on factors not limited to the delinquency of the loan. Nondelinquent loans may be classified depending on an evaluation of factors, including but not limited to, the adequacy of analysis and documentation.

(ii) Loans classified shall be reserved as follows:

- (I) Substandard loans at ten percent of outstanding amount unless other factors (e.g. history of such loans at the Credit Union) indicate a greater or lesser amount is appropriate. Loans classified as substandard loans are inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Loans classified must have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Credit Union will sustain some loss if the deficiencies are not corrected. Loss potential, while existing in the aggregate amount of substandard loans, does not have to exist in individual loans classified substandard.
- (II) Doubtful loans at 50 percent of outstanding amount. Loans classified as doubtful loans have all the weaknesses inherent in

ones classified substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable. The possibility of loss is extremely high, but because of certain important and reasonably specific pending factors which may work to the advantage and strengthening of the loan its classification as an estimated loss is deferred until its more exact status is determined. Pending factors include: proposed merger, acquisition, or liquidation actions, capital injection, perfecting liens on additional collateral, and refinancing plans.

(III) Loss loans at 100 percent of outstanding amount. Loans classified as loss loans are considered uncollectible and of such little value that their continuance as loans is not warranted. This classification does not necessarily mean that the loan has absolutely no recovery or salvage value, but rather it is not practical or desirable to defer writing off this basically worthless asset even though partial recovery may occur in the future.

(3) Construction and development lending. Loans granted under this Section to finance the construction or development of commercial or residential property shall be subject to the following additional provisions:

- (A) The aggregate of all such loans, excluding any portion of a loan secured by shares in the credit union, or deposits in another financial institution, or fully or partially insured or guaranteed by, or subject to an advance commitment to purchase by, any agency of the Federal Government or of a State or any of its political subdivisions, shall not exceed 15 percent of reserves (less the Allowance for Loan Losses account);
- (B) The borrower shall have a minimum of 35 percent equity interest in the project being financed;
- (C) Funds for such projects shall be released following on-site inspections by independent

credit union personnel, qualified as in Subpart (b)(2)(A)(vi) of this Rule in accordance with a draw schedule preapproved by the credit union.

(4) Prohibitions.

(A) Senior management employees. A credit union may not make member business loans to the following:

- (i) Any member of the Board of Directors who is compensated as such;
- (ii) The credit union's chief executive officer (typically this individual holds the title of President or Treasurer/Manager);
- (iii) Any assistant chief executive officers (e.g. Assistant President, Vice President or Assistant Treasurer/Manager);
- (iv) The chief financial officer (Comptroller);
- (v) Any associated member or immediate family member of the senior management employees listed in Subparagraphs (b)(4)(A)(i) thru (iv) of this Rule.

(B) Equity kickers/joint ventures. A credit union shall not grant a member business loan where a portion of the amount of income to be received by the credit union in conjunction with such loan is tied to the profit or sale of the business or commercial endeavor for which the loan is made.

(5) Recordkeeping. All loans, lines of credit, or letters of credit, the proceeds of which will be used for a commercial, corporate, business, investment property or venture, or agriculture purpose, shall be separately identified in the records of the credit union and reported as such in financial and statistical reports required by the Administrator in Subpart (b)(2)(C)(iv) of this Rule or the Regional Director of the National Credit Union Administration.

SECTION .0500 - REIMBURSEMENT FOR SERVICES

.0506 PERSONAL CARE SERVICES

- (a) Payment for personal care services in recipient's home,

prescribed in accordance with a plan of treatment and provided by a qualified person under supervision of a registered nurse, shall be based on a negotiated hourly fee not to exceed reasonable cost.

(b) The Division of Medical Assistance will enter into contracts with private and public non-medical inpatient institutions using 42 CFR 434-12 for the provision of personal care services for State/County Special Assistance clients residing in adult care homes. The effective dates in Subparagraphs (b)(1) and (b)(2) are Health Care Financing Administration approval dates.

(1) Effective August 1, 1995 reimbursement for private providers is determined by the Division of Medical Assistance based on a capitation per diem fee derived from review of industry costs and determination of reasonable costs with annual inflation adjustments. The initial basic per diem fee is based on one hour of services per patient day. Additional payments may be made utilizing the basic one hour per diem fee as a factor, for Medicaid eligibles that have a demonstrated need for additional care. The initial basic one hour fee is computed by determining the estimated salary, fringes, direct supervision and allowable overhead. The fee(s) may be recalculated from a cost reporting period selected by the state. Payments may not exceed the limits set in 42 CFR 447.361.

(2) Effective January 1, 1996 public providers will be paid on an interim basis using the above method. Payments are to be cost settled with any overpayment repaid to the Division of Medical Assistance. No additional payment will be made due to cost settlement.

(c) These changes to the Payment for Services Prospective Reimbursement Plan for Personal Care Services will become effective when the Health Care Financing Administration, U.S. Department of Health and Human Service, approves amendments submitted to HCFA by the Director of the Division of Medical Assistance as #MA 95-07 and #MA 95-33 wherein the Director proposes amendments of the State Plans to amend payment for services - Prospective Reimbursement Plan for Personal Care Services.

.0005 FUNDING FOR MEDICAL SERVICES

(a) Title XIX (medicaid) shall be utilized as the first funding

option for medical services. County departments of social services electing to provide medical services as described in 10 NCAC 35E .0300 shall be responsible for the processing and payment of provider claims pursuant to those medical services authorized by the county.

(b) If individuals have health insurance which will cover all or part of the bill for medical services, the amount allowed under Title XX will be the difference between the insurance payment and the maximum amount which would be allowed at medicaid rates. If the individual's insurance pays more than the allowable medicaid rate no funds will be available from Title XX.

TITLE 15A - DEPARTMENT OF ENVIRONMENT, HEALTH, AND NATURAL RESOURCES

CHAPTER 7 - COASTAL MANAGEMENT

SUBCHAPTER 7H - STATE GUIDELINES FOR AREAS OF ENVIRONMENTAL CONCERN

SECTION .0200 - THE ESTUARINE SYSTEM

.0208 USE STANDARDS

(a) General Use Standards

(1) Uses which are not water dependent shall not be permitted in coastal wetlands, estuarine waters, and public trust areas. Restaurants, residences, apartments, motels, hotels, trailer parks, private roads, factories, and parking lots are examples of uses that are not water dependent. Uses that are water dependent may include: utility easements; docks; wharfs; boat ramps; dredging; bridges and bridge approaches; revetments, bulkheads; culverts; groins; navigational aids; mooring pilings; navigational channels; simple access channels and drainage ditches.

(2) Before being granted a permit by the CRC or local permitting authority, there shall be a finding that the applicant has complied with the following standards:

(A) The location, design, and need for development, as well as the construction activities involved shall be consistent with the stated management objective.

(B) Before receiving approval for location of a use or development within these AACS, the permit-letting authority shall find that no suitable alternative site or location outside of

the AEC exists for the use or development and, further, that the applicant has selected a combination of sites and design that will have a minimum adverse impact upon the productivity and biologic integrity of coastal marshland, shellfish beds, beds of submerged aquatic vegetation, spawning and nursery areas, important nesting and wintering sites for waterfowl and wildlife, and important natural erosion barriers (cypress fringes, marshes, clay soils).

- (C) Development shall not violate water and air quality standards.
 - (D) Development shall not cause major or irreversible damage to valuable documented archaeological or historic resources.
 - (E) Development shall not measurably increase siltation.
 - (F) Development shall not create stagnant water bodies.
 - (G) Development shall be timed to have minimum adverse significant affect on life cycles of estuarine resources.
 - (H) Development shall not impede navigation or create undue interference with access to, or use of, public trust areas or estuarine waters.
- (3) When the proposed development is in conflict with the general or specific use standards set forth in this Rule, the CRC may approve the development if the applicant can demonstrate that the activity associated with the proposed project will have public benefits as identified in the findings and goals of the Coastal Area Management Act, that the public benefits clearly outweigh the long range adverse effects of the project, that there is no reasonable and prudent alternate site available for the project, and that all reasonable means and measures to mitigate adverse impacts of the project have been incorporated into the project design and will be implemented at the applicant's expense. These measures taken to mitigate or minimize adverse impacts may include actions that will:
- (A) minimize or avoid adverse impacts by limiting the magnitude or degree of the action;
 - (B) restore the affected environment; or
 - (C) compensate for the adverse impacts by replacing or providing substitute resources.
- (4) Primary nursery areas are those areas in the estuarine system where initial post larval development of finfish and crustaceans takes place. They are usually located in the uppermost sections of a system where populations are uniformly early juvenile stages. They are officially designated and described by the N.C. Marine Fisheries Commission in 15A NCAC 3B .1405 and by the N.C. Wildlife Resources Commission in 15A NCAC 10C .0110.
- (5) Outstanding Resource Waters are those estuarine

waters and public trust areas classified by the N.C. Environmental Management Commission pursuant to Title 15A, Subchapter 2B .0216 of the N.C. Administrative Code as Outstanding Resource Waters (ORW) upon finding that such waters are of exceptional state or national recreational or ecological significance. In those estuarine waters and public trust areas classified as ORW by the Environmental Management Commission (EMC), no permit required by the Coastal Area Management Act shall be approved for any project which would be inconsistent with applicable use standards adopted by the CRC, EMC, or Marine Fisheries Commission (MFC) for estuarine waters, public trust areas, or coastal wetlands. For development activities not covered by specific use standards, no permit shall be issued if the activity would, based on site specific information, materially degrade the water quality or outstanding resource values unless such degradation is temporary.

- (6) Beds of submerged aquatic vegetation (SAV) are those habitats in public trust and estuarine waters vegetated with one or more species of submergent vegetation. These vegetation beds occur in both subtidal and intertidal zones and may occur in isolated patches or cover extensive areas. In either case, the bed is defined by the presence of above-ground leaves or the below-ground rhizomes and propagules. In defining SAVs, the CRC recognizes the Aquatic Weed Control Act of 1991 (G.S. 113A-220 et. seq.) and does not intend the SAV definition and its implementing rules to apply to or conflict with the non-development control activities authorized by that Act.
- (b) Specific Use Standards
- (1) Navigation channels, canals, and boat basins shall be aligned or located so as to avoid primary nursery areas highly productive shellfish beds, beds of submerged aquatic vegetation, or significant areas of regularly or irregularly flooded coastal wetlands.
 - (A) Navigation channels and canals may be allowed through narrow fringes of regularly and irregularly flooded coastal wetlands if the loss of wetlands will have no significant adverse impacts on fishery resources, water quality or adjacent wetlands, and, if there is no reasonable alternative that would avoid the wetland losses.
 - (B) All spoil material from new construction shall be confined landward of regularly and irregularly flooded coastal wetlands and stabilized to prevent entry of sediments into the adjacent water bodies or marsh.
 - (C) Spoil from maintenance of channels and canals through irregularly flooded wetlands shall be placed on non-wetland areas, remnant spoil piles, or disposed of by a method having no

- significant, long term wetland impacts. Under no circumstances shall spoil be placed on regularly flooded wetlands.
- (D) Widths of the canals and channels shall be the minimum required to meet the applicant's needs and provide adequate water circulation.
 - (E) Boat basin design shall maximize water exchange by having the widest possible opening and the shortest practical entrance canal. Depths of boat basins shall decrease from the waterward end inland.
 - (F) Any canal or boat basin shall be excavated no deeper than the depth of the connecting channels.
 - (G) Canals for the purpose of multiple residential development shall have:
 - (i) no septic tanks unless they meet the standards set by the Division of Environmental Management and the Division of Environmental Health;
 - (ii) no untreated or treated point source discharge;
 - (iii) storm water routing and retention areas such as settling basins and grassed swales.
 - (H) Construction of finger canal systems shall not be allowed. Canals shall be either straight or meandering with no right angle corners.
 - (I) Canals shall be designed so as not to create an erosion hazard to adjoining property. Design may include bulkheading, vegetative stabilization, or adequate setbacks based on soil characteristics.
 - (J) Maintenance excavation in canals, channels and boat basins within primary nursery areas and beds of submerged aquatic vegetation shall be avoided. However, when essential to maintain a traditional and established use, maintenance excavation may be approved if the applicant meets all of the following criteria as shown by clear and convincing evidence accompanying the permit application. This Rule does not affect restrictions placed on permits issued after March 1, 1991.
 - (i) The applicant demonstrates and documents that a water-dependent need exists for the excavation; and
 - (ii) There exists a previously permitted channel which was constructed or maintained under permits issued by the State or Federal government. If a natural channel was in use, or if a human-made channel was constructed before permitting was necessary, there shall be clear evidence that the channel was continuously used for a specific purpose; and
 - (iii) Excavated material can be removed and placed in an approved disposal area without significantly impacting adjacent nursery areas and beds of submerged aquatic vegetation; and
 - (iv) The original depth and width of a human-made or natural channel will not be increased to allow a new or expanded use of the channel.
- (2) Hydraulic Dredging
- (A) The terminal end of the dredge pipeline shall be positioned at a distance sufficient to preclude erosion of the containment dike and a maximum distance from spillways to allow adequate settlement of suspended solids.
 - (B) Dredge spoil shall be either confined on high ground by adequate retaining structures or if the material is suitable, deposited on beaches for purposes of renourishment, with the exception of (G) of this Subsection (b)(2).
 - (C) Confinement of excavated materials shall be on high ground landward of regularly and irregularly flooded marshland and with adequate soil stabilization measures to prevent entry of sediments into the adjacent water bodies or marsh.
 - (D) Effluent from diked areas receiving disposal from hydraulic dredging operations shall be contained by pipe, trough, or similar device to a point waterward of emergent vegetation or, where local conditions require, below mean low water.
 - (E) When possible, effluent from diked disposal areas shall be returned to the area being dredged.
 - (F) A water control structure shall be installed at the intake end of the effluent pipe.
 - (G) Publicly funded projects shall be considered by review agencies on a case-by-case basis with respect to dredging methods and spoil disposal.
 - (H) Dredge spoil from closed shellfish waters and effluent from diked disposal areas used when dredging in closed shellfish waters shall be returned to the closed shellfish waters.
- (3) Drainage Ditches
- (A) Drainage ditches located through any marshland shall not exceed six feet wide by four feet deep (from ground surface) unless the applicant shows that larger ditches are necessary for adequate drainage.
 - (B) Spoil derived from the construction or maintenance of drainage ditches through regularly flooded marsh shall be placed landward of these marsh areas in a manner that will insure that entry of sediment into the water or marsh will not occur. Spoil derived

from the construction or maintenance of drainage ditches through irregularly flooded marshes shall be placed on nonwetlands wherever feasible. Non-wetland areas include relic disposal sites.

- (C) Excavation of new ditches through high ground shall take place landward of a temporary earthen plug or other methods to minimize siltation to adjacent water bodies.
- (D) Drainage ditches shall not have a significant adverse effect on primary nursery areas, productive shellfish beds, beds of submerged aquatic vegetation, or other documented important estuarine habitat. Particular attention shall be placed on the effects of freshwater inflows, sediment, and nutrient introduction. Settling basins, water gates, retention structures are examples of design alternatives that may be used to minimize sediment introduction.
- (4) Nonagricultural Drainage
 - (A) Drainage ditches shall be designed so that restrictions in the volume or diversions of flow are minimized to both surface and ground water.
 - (B) Drainage ditches shall provide for the passage of migratory organisms by allowing free passage of water of sufficient depth.
 - (C) Drainage ditches shall not create stagnant water pools or significant changes in the velocity of flow.
 - (D) Drainage ditches shall not divert or restrict water flow to important wetlands or marine habitats.
- (5) Marinas. Marinas are defined as any publicly or privately owned dock, basin or wet boat storage facility constructed to accommodate more than 10 boats and providing any of the following services: permanent or transient docking spaces, dry storage, fueling facilities, haulout facilities and repair service. Excluded from this definition are boat ramp facilities allowing access only, temporary docking and none of the preceding services. Expansion of existing facilities shall also comply with these standards for all development other than maintenance and repair necessary to maintain previous service levels.
 - (A) Marinas shall be sited in non-wetland areas or in deep waters (areas not requiring dredging) and shall not disturb valuable shallow water, submerged aquatic vegetation, and wetland habitats, except for dredging necessary for access to high-ground sites. The following four alternatives for siting marinas are listed in order of preference for the least damaging alternative; marina projects shall be designed to have the highest of these four priorities that is deemed feasible by the permit letting agency:

- (i) an upland basin site requiring no alteration of wetland or estuarine habitat and providing adequate flushing by tidal or wind generated water circulation;
 - (ii) an upland basin site requiring dredging for access when the necessary dredging and operation of the marina will not result in the significant degradation of existing fishery, shellfish, or wetland resources and the basin design shall provide adequate flushing by tidal or wind generated water circulation;
 - (iii) an open water site located outside a primary nursery area which utilizes piers or docks rather than channels or canals to reach deeper water; and
 - (iv) an open water marina requiring excavation of no intertidal habitat, and no dredging greater than the depth of the connecting channel.
- (B) Marinas which require dredging shall not be located in primary nursery areas nor in areas which require dredging through primary nursery areas for access. Maintenance dredging in primary nursery areas for existing marinas shall be considered on a case-by-case under the standards set out in Part (b)(1)(J) of this Rule.
 - (C) To minimize coverage of public trust areas by docks and moored vessels, dry storage marinas shall be used where feasible.
 - (D) Marinas to be developed in waters subject to public trust rights (other than those created by dredging upland basins or canals) for the purpose of providing docking for residential developments shall be allowed no more than 27 square feet of public trust areas for every one linear foot of shoreline adjacent to these public trust areas for construction of docks and mooring facilities. The 27 square feet allocation shall not apply to fairway areas between parallel piers or any portion of the pier used only for access from land to the docking spaces.
 - (E) To protect water quality of shellfishing areas, marinas shall not be located within areas where shellfish harvesting for human consumption is a significant existing use or adjacent to such areas if shellfish harvest closure is anticipated to result from the location of the marina. In compliance with Section 101(a)(2) of the Clean Water Act and North Carolina Water Quality Standards adopted pursuant to that section, shellfish harvesting is a significant existing use if it can be established that shellfish have been

- regularly harvested for human consumption since November 28, 1975 or that shellfish apparently are propagating and surviving in a biologically suitable habitat and are available and suitable for harvesting for the purpose of human consumption. The Division of Marine Fisheries shall be consulted regarding the significance of shellfish harvest as an existing use and the magnitude of the quantities of shellfish which have been harvested or are available for harvest in the area where harvest will be affected by the development.
- (F) Marinas shall not be located without written consent from the controlling parties in areas of submerged lands which have been leased from the state or deeded by the state.
 - (G) Marina basins shall be designed to promote flushing through the following design criteria:
 - (i) the basin and channel depths shall gradually increase toward open water and shall never be deeper than the waters to which they connect; and
 - (ii) when possible, an opening shall be provided at opposite ends of the basin to establish flow-through circulation.
 - (H) Marinas shall be designed to minimize adverse effects on navigation and public use of public trust areas while allowing the applicant adequate access to deep waters.
 - (I) Marinas shall be located and constructed so as to avoid adverse impacts on navigation throughout all federally maintained channels and their immediate boundaries. This includes mooring sites (permanent or temporary), speed or traffic reductions, or any other device, either physical or regulatory, that may cause a federally maintained channel to be restricted.
 - (J) Open water marinas shall not be enclosed within breakwaters that preclude circulation sufficient to maintain water quality.
 - (K) Marinas which require dredging shall provide areas to accomplish disposal needs for future dredging consistent with the requirements in Subparagraph (b)(2) of this Rule. Proof of the ability to truck the spoil material from the marina site to an acceptable disposal area will be acceptable.
 - (L) Marina design shall comply with all applicable requirements for management of stormwater runoff.
 - (M) Marinas shall post a notice prohibiting the discharge of any waste from boat toilets and explaining the availability of information on local pump-out services.
 - (N) Boat maintenance areas shall be designed so that all scraping, sandblasting, and painting will be done over dry land with adequate containment devices to prevent entry of waste materials into adjacent waters.
 - (O) All marinas shall comply with all applicable standards for docks and piers, bulkheading, dredging and spoil disposal.
 - (P) All applications for marinas shall be reviewed to determine their potential impact and compliance with applicable standards. Such review shall consider the cumulative impacts of marina development.
 - (Q) Replacement of existing marinas to maintain previous service levels shall be allowed provided that the preceding rules are complied with to the maximum extent possible, with due consideration being given to replacement costs, service needs.
- (6) Docks and Piers
- (A) Docks and piers shall not exceed six feet in width. Wider docks and piers shall be permitted only if the greater width is necessary for safe use, to improve public access; or to support a water dependent use that cannot otherwise occur.
 - (B) Any portion of a dock or pier (either fixed or floating) extending from the main structure and six feet or less in width shall be considered either a "T" or a finger pier.
 - (C) Any portion of a dock or pier (either fixed or floating) greater than six feet wide shall be considered a platform or deck.
 - (D) The combined area of all "T"s, finger piers, platforms, and decks must not exceed a combined total area of four square feet per linear foot of shoreline. Projects requiring dimensions greater than those stated in this Rule shall be permitted only if the greater dimensions are necessary for safe use, or to support a water dependent use that cannot otherwise occur.
 - (E) "T"s, platforms and decks shall have no more than six feet of any dimension extending over coastal wetlands.
 - (F) Docks, piers, "T"s and associated structures built over wetlands must be elevated at least three feet over the wetland substrate measured from the bottom of the decking.
 - (G) Boathouses shall not exceed 400 square feet except to accommodate a demonstrated need for a larger boathouse and shall have sides extending no farther than one-half the height of the walls and only covering the top half of the walls. Measurements of square footage shall be taken of the greatest exterior dimensions. Boathouses shall not be allowed on lots with less than 75 linear feet of shoreline. Size restrictions shall not apply to marinas.

- (H) The total area enclosed by boat lifts shall not exceed 400 square feet.
- (I) Piers, docks, decks, platforms and boat houses shall be single story. They may be roofed but shall not be designed to allow second story use.
- (J) Pier length shall be limited by:
 - (i) not extending beyond the established pier length along the same shoreline for similar use; (This restriction shall not apply to piers 100 feet or less in length unless necessary to avoid unreasonable interference with navigation or other uses of the waters by the public);
 - (ii) not extending into the channel portion of the water body; and
 - (iii) not extending more than one-fourth the width of a natural water body, human-made canal or basin. Measurements to determine widths of the water body, canals or basins shall be made from the waterward edge of any coastal wetland vegetation which borders the water body. The one-fourth length limitation shall not apply in areas where the U.S. Army Corps of Engineers, or a local government in consultation with the Corps of Engineers, has established an official pier-head line. The one-fourth length limitation shall not apply when the proposed pier is located between longer piers within 200 feet of the applicant's property. However, the proposed pier cannot be longer than the pier head line established by the adjacent piers, nor longer than 1/3 the width of the water body.
- (K) Piers longer than 400 feet shall be permitted only if the proposed length gives access to deeper water at a rate of at least one foot at each 100 foot increment of pier length longer than 400 feet, or, if the additional length is necessary to span some obstruction to navigation. Measurements to determine pier lengths shall be made from the waterward edge of any coastal wetland vegetation which borders the water body.
- (L) Piers shall not interfere with the access to any riparian property and shall have a minimum setback of 15 feet between any part of the pier and the adjacent property owner's areas of riparian access. The line of division of areas of riparian access shall be established by drawing a line along the channel or deep water in front of the properties, then drawing a line perpendicular to the line of the channel so that it intersects with the shore at the point the upland property line meets the water's edge. The minimum setback provided in the rule may be waived by the written agreement of the adjacent riparian owner(s) or when two adjoining riparian owners are co-applicants. Should the adjacent property be sold before construction of the pier commences, the applicant shall obtain a written agreement with the new owner waiving the minimum setback and submit it to the permitting agency prior to initiating any development of the pier. Application of this Rule may be aided by reference to the approved diagram in 15A NCAC 7H .1205(q) illustrating the rule as applied to various shoreline configurations. Copies of the diagram may be obtained from the Division of Coastal Management. When shoreline configuration is such that a perpendicular alignment cannot be achieved, the pier shall be aligned to meet the intent of this Rule to the maximum extent practicable.
- (M) Applicants for authorization to construct a dock or pier shall provide notice of the permit application or exemption request to the owner of any part of a shellfish franchise or lease over which the proposed dock or pier would extend. The applicant shall allow the lease holder the opportunity to mark a navigation route from the pier to the edge of the lease.
- (7) Bulkheads and Shore Stabilization Measures
 - (A) Bulkhead alignment, for the purpose of shoreline stabilization, shall approximate mean high water or normal water level.
 - (B) Bulkheads shall be constructed landward of significant marshland or marshgrass fringes.
 - (C) Bulkhead fill material shall be obtained from an upland approved pursuant to this Section, or if the bulkhead is a part of a permitted project involving excavation from a non-upland source, the material so obtained may be contained behind the bulkhead.
 - (D) Bulkheads or other structures employed for shoreline stabilization shall be permitted below approximate mean high water or normal water level only when the following standards are met:
 - (i) the property to be bulkheaded has an identifiable erosion problem, whether it results from natural causes or adjacent bulkheads, or it has unusual geographic or geologic features, e.g. steep grade bank, which will cause the applicant unreasonable hardship under the other provisions of this Rule;
 - (ii) the bulkhead alignment extends no further below approximate mean high water or normal water level than

- necessary to allow recovery of the area eroded in the year prior to the date of application, to align with adjacent bulkheads, or to mitigate the unreasonable hardship resulting from the unusual geographic or geologic features;
- (iii) the bulkhead alignment will not result in significant adverse impacts to public trust rights or to the property of adjacent riparian owners;
 - (iv) the need for a bulkhead below approximate mean high water or normal water level is documented in the Field Investigation Report or other reports prepared by the Division of Coastal Management; and
 - (v) the property to be bulkheaded is in a nonoceanfront area.
- (E) Where possible, sloping rip-rap, gabions, or vegetation shall be used rather than vertical seawalls.
- (8) Beach Nourishment
- (A) Beach creation or maintenance may be allowed to enhance water related recreational facilities for public, commercial, and private use.
 - (B) Beaches may be created or maintained in areas where they have historically been found due to natural processes. They will not be allowed in areas of high erosion rates where frequent maintenance will be necessary.
 - (C) Placing unconfined sand material in the water and along the shoreline shall not be allowed as a method of shoreline erosion control.
 - (D) Material placed in the water and along the shoreline shall be clean sand free from pollutants and highly erodible finger material. Grain size shall be equal to or larger than that found naturally at the site.
 - (E) Material from dredging projects may be used for beach nourishment if:
 - (i) it is first handled in a manner consistent with rules governing spoil disposal;
 - (ii) it is allowed to dry; and
 - (iii) only that material of acceptable grain size is removed from the disposal site for placement on the beach. Material shall not be placed directly on the beach by dredge or dragline during maintenance excavation.
 - (F) Beach creation shall not be allowed in any primary nursery areas, nor in any areas where siltation from the site would pose a threat to shellfish beds.
 - (G) Material shall not be placed on any coastal wetlands or beds of submerged aquatic vegetation.
 - (H) Material shall not be placed on any submerged bottom with significant shellfish resources.
 - (I) Beach construction shall not create the potential for filling adjacent or nearby navigation channels, canals, or boat basins.
 - (J) Beach construction shall not violate water quality standards.
 - (K) Permit renewal of these projects shall require an evaluation of any adverse impacts of the original work.
 - (L) Permits issued for this development shall be limited to authorizing beach nourishment only one time during the life of the permit. Permits may be renewed for maintenance work or repeated need for nourishment.
- (9) Wooden and Riprap Groins
- (A) Groins shall not extend more than 25 feet waterward of the mean high water or normal water level unless a longer structure is justified by site specific conditions, sound engineering and design principals.
 - (B) Groins shall be set back a minimum of 15 feet from the adjoining property lines. This setback may be waived by written agreement of the adjacent riparian owner(s) or when two adjoining riparian owners are co-applicants. Should the adjacent property be sold before construction of the groin commences, the applicant shall obtain a written agreement with the new owner waiving the minimum setback and submit it to the permitting agency prior to initiating any development of the groin.
 - (C) Groins shall pose no threat to navigation.
 - (D) The height of groins shall not exceed 1 foot above mean high water or the normal water level.
 - (E) No more than two structures shall be allowed per 100 feet of shoreline unless the applicant provides evidence that more structures are needed for shoreline stabilization.
 - (F) "L" and "T" sections shall not be allowed at the end of groins.
 - (G) Riprap material used for groin construction shall be free from loose dirt or any other pollutant in other than non-harmful quantities and of a size sufficient to prevent its movement from the site by wave and current action.
- (10) "Freestanding Moorings".
- (A) A "freestanding mooring" is any means to attach a ship, boat, vessel, floating structure or other water craft to a stationary underwater device, mooring buoy, buoyed anchor, or piling (as long as the piling is not associated with an existing or proposed pier, dock, or boathouse).
 - (B) Freestanding moorings shall be permitted

- only:
 - (i) to riparian property owners within their riparian corridors; or
 - (ii) to any applicant proposing to locate a mooring buoy consistent with a water use plan that may be incorporated into either the local zoning or land use plan.
- (C) All approved mooring fields shall provide suitable area for access to any mooring(s) and other land based operations which shall include but not be limited to wastewater pumpout, trash disposal and vehicle parking.
- (D) If the agreement referenced in specific condition in Part (b)(10)(C) of this Rule is terminated or the facility no longer exist, the permit shall become null and void and the permitted project removed from the AEC.
- (E) To protect water quality of shellfishing areas, mooring fields shall not be located within areas where shellfish harvesting for human consumption is a significant existing use or adjacent to such areas if shellfish harvest closure is anticipated to result from the location of the mooring field. In compliance with Section 101(a)(2) of the Federal Water Pollution Control Act, 33 U.S.C. 1251 (a)(2), and North Carolina Water Quality Standards adopted pursuant to that section, shellfish harvesting is a significant existing use if it can be established that shellfish have been regularly harvested for human consumption since November 28, 1975 or that shellfish apparently are propagating and surviving in a biologically suitable habitat and are available and suitable for harvesting for the purpose of human consumption. The Division of Marine Fisheries shall be consulted regarding the significance of shellfish harvest as an existing use and the magnitude of the quantities of shellfish which have been harvested or are available for harvest in the area where harvest will be affected by the development.
- (F) Moorings shall not be located without written consent from the controlling parties in areas of submerged lands which have been leased from the state or deeded by the state.
- (G) Moorings shall be located and constructed so as to avoid adverse impacts on navigation throughout all federally maintained channels and their immediate boundaries. This includes mooring sites (permanent or temporary), speed or traffic reductions, or any other device, either physical or regulatory, that may cause a federally maintained channel to be restricted.
- (H) Open water moorings shall not be enclosed within breakwaters that preclude circulation sufficient to maintain water quality.
 - (I) Moorings and the associated land based operation design shall comply with all applicable requirements for management of stormwater runoff.
 - (J) Mooring fields shall have posted in view of patrons a notice prohibiting the discharge of any waste from boat toilets or any other discharge and explaining the availability of information on local pump-out services and waste disposal.
 - (K) Freestanding moorings associated with commercial shipping, public service or temporary construction/salvage operations may be permitted without a public sponsor and shall be evaluated on a case-by-case basis.
 - (L) Freestanding mooring buoys and piles shall be evaluated based upon the arc of the swing including the vessel to be moored. Moorings and the attached vessel shall not interfere with the access of any riparian owner nor shall it block riparian access by blocking channels, deep water, etc. which allows riparian access. Freestanding moorings shall not interfere with the ability of any riparian owner to place a pier for access.
 - (M) Freestanding moorings shall not be established in submerged cable/pipe crossing areas or in a manner which interferes with the operations of an access through any bridge.
 - (N) Freestanding moorings shall be marked or colored in compliance with U.S. Coast Guard and N.C. Wildlife Resource Commission requirements and the required marking maintained for the life of the mooring(s).
 - (O) The type of material used to create a mooring must be free of pollutants and of a design and type of material so as to not present a hazard to navigation or public safety.
 - (P) Existing freestanding moorings (i.e. buoys/pilings) may be maintained in place for two years. However, if the moorings(s) deteriorate or are damaged such that replacement is necessary during the two year period, the mooring(s) then shall comply with those guidelines of the Division in place at that time. In any event, existing moorings shall comply with these Rules within two years.
- (11) Filling of Canals, Basins and Ditches - Notwithstanding the general use standards for estuarine systems as set out in 7H .0208(a) of this Rule, filling canals, basins and ditches shall be allowed if:
 - (A) the area to be filled was not created by excavating lands which were below the normal high water or normal water level; and
 - (B) if the area was created from wetlands, the elevation of the proposed filling does not

- exceed the elevation of said wetlands so that wetland function will be restored; and
- (C) the filling will not adversely impact any designated primary nursery area, shellfish bed, bed of submerged aquatic vegetation, coastal wetlands other than a narrow fringe around the shoreline, recognized public trust right or established public trust usage; and
 - (D) the filling will not adversely affect the value and enjoyment of property of any riparian owner; and
 - (E) the filling will further some policy of the Commission such as retreating from erosion or avoiding water quality degradation.

SUBCHAPTER 8F - CERTIFICATION OF OPERATORS OF ANIMAL WASTE MANAGEMENT SYSTEMS

SECTION .0100 - GENERAL PURPOSE/ DEFINITIONS

.0101 PURPOSE

(a) The purpose of these Rules is to reduce nonpoint source pollution in order to protect the public health and to conserve and protect the quality of the State's water resources, to encourage the development and improvement of the State's agricultural land for the production of food and other agricultural products, and to require the examination of animal waste management system operators and certification of their competency to operate or supervise the operation of those systems.

(b) These Rules apply to all operators of animal waste management systems that are required to designate an operator in charge as specified by G.S. 90A-47.2(a). These animal waste management systems include those systems that are designed to serve an animal operation as defined by G.S. 143B-215.10B(1).

(c) The Certification Commission shall classify animal waste management systems based on the types of structures and nonstructural practices serving a feedlot that provide for the collection, treatment, storage, or land application of animal waste.

(d) The Certification Commission shall establish certifications for each type of animal waste management system so that persons holding these certificates shall be affirmed competent to operate a specific type of animal waste management system.

Type A animal waste management systems are generally used to treat waste generated by monogastric animals which produce a low-fiber waste.
- (2) Type B: These animal waste management systems generally include the following structures and nonstructural components that provide for the collection, treatment, storage and land application of animal waste and primarily rely on soil/plant systems for the treatment of animal waste: dry stacks; solids and slurry collection equipment; storage ponds for the collection of solids and runoff; pumps, pipes and associated appurtenances that convey the waste from point of generation to final Type B animal waste management systems are generally used to treat waste generated by ruminants and other animals which produce a high-fiber waste.

(b) Animal waste management systems which include components that are significantly different than the system described in Subparagraph (a)(1) of this Rule shall be evaluated by the Commission, or its designee, to determine if the system is subject to classification in accordance with Rule 15A NCAC 8C .0102(b).

- (2) in a manner that violates laws prohibiting discrimination; or
- (3) to managers or supervisors whose failure to comply with the performance management rules resulted in the loss of an increase or a bonus by employees under their supervision.

(d) No agency shall set limits so as to preclude an eligible employee from receiving a career growth recognition award, cost-of-living adjustment, or performance bonus; or to initiate written disciplinary procedures for the purpose of precluding an eligible employee from receiving a cost-of-living adjustment.

(e) When a work cycle has been completed but an overall summary rating has not been given, the State Personnel Director may order the agency to give an accurate rating. If the agency fails to give a rating, the employee shall be given a rating of no less than level 3. Once a rating is given for work performed during a cycle for which the General Assembly has allocated funds for an increase under the Comprehensive Compensation System, the employee shall, if allowed by enactment by the General Assembly and the rules in this

Section be eligible for the increase retroactive to the date that other increases were awarded.

(f) **Final Disciplinary Procedure Defined:** For purposes of eligibility for salary increases, an employee in final disciplinary procedure is an employee whose personnel file includes:

- (1) two active disciplinary actions of any type; or
- (2) an active suspension without pay or demotion.

.2514 FINAL DISCIPLINARY PROCEDURE

For purpose of this Section only, a final disciplinary procedure is deemed to be resolved:

- (1) when it becomes inactive in accordance with 25 NCAC 1J .0614(g);
- (2) when an authorized manager or supervisor places a written statement in the personnel file of an affected employee indicating that the issue addressed in the final written disciplinary procedure, while not inactive for purpose of future discipline, is sufficiently resolved to warrant the granting of the appropriate salary increase; or
- (3) when the presence of the same final written disciplinary procedure in the personnel file was utilized as a basis to deny a salary increase in a previous performance management cycle.

SUBCHAPTER 1E - EMPLOYEE BENEFITS

SECTION .0700 - WORKER'S COMPENSATION LEAVE

.0705 ADMINISTRATION

(a) Each state agency shall accept employer liability for the state and pay claims. To assure the employee of the benefits provided by the Workers' Compensation Act and to effectively control the cost related to on-the-job injuries, each agency shall designate a Workers' Compensation Administrator to be responsible for the effectiveness of processing and monitoring the workers' compensation claims.

(b) The agency shall, on those cases that involve possible litigation issues, contact the Attorney General's Office.

(c) The agency shall submit all reportable claims and valid medical and compensation payments to the Industrial Commission for approval.

(d) The Office of State Personnel through its Employee Risk Control Services Division shall provide assistance to agency personnel in managing their workers' compensation programs and insure that all agencies provide consistent application of coverage and compensation to injured employees. This office also shall provide the agencies with the State Government Workers' Compensation Program Manual which is an operational manual used as a guide in processing workers' compensation claims.

(e) The Employee Risk Control Services Division shall measure and evaluate the effectiveness of the workers' compensation program at each agency and recommend changes to achieve optimum results. It shall maintain a statistical data base summarizing a statewide analysis of total expenditures and injuries, and develop training and educational materials for use in training programs for the agencies.

History Note: Authority G.S. 126-4;

Eff. November 1, 1987;

Amended Eff. August 1, 1998; September 1, 1989.

.0707 USE OF LEAVE

(a) When an employee is injured, he must go on workers' compensation leave and receive the workers' compensation weekly benefit after the required waiting period required by G.S. 97-28. One of the following options may be chosen:

- (1) Option 1: Elect to take sick or vacation leave during the required waiting period and then go on workers' compensation leave and begin drawing workers' compensation weekly benefits.
- (2) Option 2: Elect to go on workers' compensation leave with no pay for the required waiting period and then begin drawing workers' compensation weekly benefits.

If the injury results in disability of more than a specified number of days, as indicated in G.S. 97-28, the workers' compensation weekly benefit shall be allowed from the date of disability. If this occurs in the case of an employee who elected to use leave during the waiting period, no adjustment shall be made in the leave used for these workdays.

(b) Under options 1 and 2 in Paragraph (a) of this Rule, after the employee has gone on workers' compensation leave, the weekly benefit may be supplemented by the use of partial sick or vacation leave, earned prior to the injury, in accordance with a schedule published by the Office of State Personnel each year. Since the employee must receive the weekly benefit, this schedule shall provide an income approximately equal to the past practice of using 100 percent of sick or vacation leave.

(c) Compensatory time may be substituted for sick or vacation leave if applied within the time frames provided under the Hours of Work and Overtime Compensation Policy. (reference: 25 NCAC 1D, Section .1900, Rule .1928).

(d) If the employee has earned leave or compensatory time and chooses to use it while drawing the weekly benefit, it shall be paid on a temporary payroll at the employee's hourly rate of pay. It shall be subject to State and Federal withholding taxes and Social Security, but not subject to retirement, just the same

as other temporary pay.

Note: Once an election is made under Paragraphs (a) through (c), it may not be rescinded for the duration of the claim.

(e) Unused leave may be retained for future use.

(f) Employees injured on the job in a compensable accident who have returned to work, but continue to require medical or therapy visits to reach maximum medical improvement, shall not be charged leave for time lost from work for required medical or therapy treatment.

(g) **Employee Refusal of Coverage:** Under certain circumstances involving third party liability an employee may elect to refuse workers' compensation benefits. If an employee

refuses workers' compensation benefits for injuries resulting from an on the job injury a release statement, provided by the agency, must be signed by the employee. Unless there is a signed release statement an employee who loses time from work as a result of an on the job injury must be placed under the workers' compensation leave policy.

RULES REVIEW COMMISSION MEETING DATES

November 20, 1997
 December 18, 1997

January 15, 1998
 February 19, 1998

The NC Rules Review Commission is considering adopting the following rule:

**RULE #10
 FILING RECEIPTS**

- (a) When an agency files a permanent rule for which there is a temporary rule it shall obtain a dated and signed receipt from the RRC.
- (b) When an agency files any other permanent rule, it may obtain a dated and signed receipt from the RRC.
- (c) If the agency fails to obtain a receipt, the date of filing shall be considered the next 20th day of the month.

Written comment may be submitted to:

Joseph J. DeLuca, Jr., Staff Director
 NC Rules Review Commission
 1307 Glenwood Ave. #159
 Raleigh, NC 27605

The deadline for submitting such comment is Monday, December 15, 1997.

A public hearing on the above rule is tentatively scheduled at the conclusion of the November 20, 1997 Rules Review Commission meeting, convening at 10:00 a.m.

Agency staff comment:

According to N.C.G.S. 150B-21.1(d)(5) a temporary rule expires 270 days after it was published in the North Carolina Register (NCR) unless the proposed permanent rule has been filed with the RRC. Recently some temporary rules have expired for failure to file the permanent rule on time. (Note that expiration of the temporary rule does not extinguish the permanent rulemaking. An agency may continue with its permanent rulemaking even though its temporary rule may have expired.) We have not normally noted the filing date with us of any rules; we simply accumulate them until the 20th of the month and then prepare the log for the following month.

Staff has proposed that the commission adopt a rule requiring agencies to obtain a filing receipt when filing a permanent rule replacing a temporary rule and permitting them to obtain a receipt for any other rule filing. Please note that there has never been an issue of whether or not a rule was filed with us or when precisely it was filed. We would like to keep it that way. To that end

we have proposed the above rule.

TERESA M. COLTRAIN,
Petitioner,

v.

SECRETARY OF STATE,
Respondent.

RECOMMENDED DECISION

This matter came on for hearing before the undersigned administrative law judge on September 29, 1997, in Raleigh.

The petitioner appeared *pro se*. Ms. Jo Ann Weaver Hull represented the respondent. The petitioner testified. The respondent presented one witness and introduced three exhibits. Briefs were filed on October 7 and 20, 1997.

ISSUE

Did the respondent properly revoke the petitioner's notary public commission?

FINDINGS OF FACT

1. The Secretary of State is authorized by GS Chapter 10A to grant, deny and revoke notary public commissions. The petitioner received a notary public commission on November 1, 1994.

2. Mr. James Golden was the petitioner's employer. Ms. Danielle Christine Gilman informed the petitioner that Mr. Golden would sign her name on a certificate of title. Mr. Golden thereafter requested the petitioner to notarize the signature after he signed Ms. Gilman's name on the certificate of title. Mr. Golden did not have a written power of attorney on behalf of Ms. Gilman.

CONCLUSIONS OF LAW

1. GS 10A-3(1) defines an "acknowledgment" as "(a) notarial act in which the notary certifies a signer, whose identity is personally known to the notary or proven on the basis of satisfactory evidence, has admitted, in the notary's presence, having signed a document voluntarily."

2. The petitioner violated GS 10A-3(1) because, although Mr. Golden appeared before her, the petitioner acknowledged that Ms. Gilman signed the document in her presence.

3. The petitioner therefore engaged in official misconduct pursuant to GS 10A-3(6).

4. The Secretary of State is authorized to revoke a commission for official misconduct. See GS 10A-13(d) and 10A-4(c).

RECOMMENDED DECISION

It is recommended that the Secretary of State revoke the petitioner's commission.

NOTICE

The final decision in this contested case will be made by the Secretary of State. The parties have the right to file exceptions to this recommended decision and to present written arguments to this agency. The agency will mail a copy of the final decision to the parties, the attorneys of record and the Office of Administrative Hearings.

This the 22nd day of October, 1997.

Robert Roosevelt Reilly, Jr.
Administrative Law Judge

The North Carolina Administrative Code (NCAC) has four major subdivisions of rules. Two of these, titles and chapters, are mandatory. The major subdivision of the NCAC is the title. Each major department in the North Carolina executive branch of government has been assigned a title number. Titles are further broken down into chapters which shall be numerical in order. The other two, subchapters and sections are optional subdivisions to be used by agencies when appropriate.
